

Specification Grammar

	Leading Specifications	Leading specifications specify engineering objects.	$L \rightarrow O$	Context and Objective	
	Engineering Objects	Engineering objects specify engineering variables.	$O \rightarrow V$	Structure and Integration	
	Engineering Variables	Engineering variables specify observable states.	$V \rightarrow S$	Constraint and Optimization	
	Observable States	Observable states specify measured states.	$S \rightarrow M$	Measurement and Validation	
	Measured States	Measured states inform admissible generalizations.	$M \rightarrow G$	Learning and Generalization	

Admissible generalizations trail leading specifications.
